2 0 1 9

An aerial photograph of a rocky coastline. The water is a mix of light blue and white, with waves crashing against the shore, creating white foam. The rocks are dark and jagged, scattered along the edge of the water. The overall scene is dynamic and natural.

There are many interesting things in the world. But what can be compared to the beautiful and mysterious Ocean-planet?

*There are always  
things to do  
in this life.*

*For example, you can swing  
on a swing,*

*...start doing fitness,*

*... and even try Corps de ballet.*

*You can  
arrange your  
personal life*

*(they say that sometimes,  
it does not end in a bad way).*

*However, many true romantics think about the sea more than anything else and are drawn to it.*

*Those who do not have a ship  
walk on foot near it.*

*And those who have something -  
sail, sometimes jumping with joy.*

*As for people  
who have  
neither a sea  
nor a ship, they  
sadly sit on the  
shore and save  
money for it.*

*And here,  
a quite  
logical  
question  
appears:*

*...what is so special  
they find in this sea?*

*Why don't other doors in this life  
attract them as much?*

*The answer here is simple.  
The Ocean is often compared  
to a large, little-studied planet.*

*And, as you  
know, all  
the planets...*

*...possess strong gravitation.*

*Therefore, the influence of the Ocean  
is felt even far away from it.*

*It penetrates the homes  
of sea lovers and reaches...*

*...the most secluded corners  
of the land.*

*And it is not by accident,*

*...the Ocean always has  
something to show people.*

*Over the centuries, the Ocean  
has inspired various sculptors,*

*...abstractionists,*

*...architects,*

*...and others.*

*There are  
a great deal  
of surprises  
that the Ocean  
prepares  
for those ...*

*...who dare  
to touch it  
deeper!*

*However, only  
the Ocean itself  
knows about  
this in detail...*

*...and those who trust it...*

# Ocean planet

A photo story

An underwater photograph looking up at the water's surface. The water is a deep, vibrant blue. The surface is distorted by ripples and reflections, creating a view of a bright blue sky with white, fluffy clouds. Numerous small, dark silhouettes of birds are scattered across the sky, appearing to fly through the water. The overall effect is a surreal, dreamlike scene that connects the ocean to the sky.

*There are many interesting  
things in the world.*

*But what can be compared  
to the beautiful and mysterious  
Ocean-planet?*
